# Simplify your security and hunt threats efficiently.

Unite core cyber security capabilities into one intelligent cloud-based platform. WithSecure™ Elements reduces silos, vulnerability gaps, and the complexity that so often hinders instant detection and response to incidents.

The platform shares data and controls across critical security components. As a result, you get unparalleled enterprise-wide visibility from endpoints and cloud applications to shadow IT. Keep abreast of emerging threats and the rapidly changing cyber threat landscape with leading-edge global threat intelligence. Integrated vulnerability data and behavioural analysis arms you with true situational awareness.

No looking for a needle in a haystack. No alert noises to distract you. No case is too tough for you with our elite threat hunter investigation and response guidance - available 24/7 on demand. Adapt and optimize on the go with modular architecture and flexible subscription options.

- ✔ **Know** your true attack surface and risks status.
- ✔ **Understand** complex chains of events through clear, simplified visualizations.
- ✔ **Leave no** vulnerabilities or unpatched systems behind to exploit.
- ✔ **Investigate**, contain and remediate threats efficiently.
- ✔ **Fend off** known and zero-day Ransomware and malware autonomously.
- ✔ **Automate** all you can and streamline your processes.
- ✔ **Cut down** analysis times with high fidelity detections.
- ✔ **Do more with less.** Offload mundane security management tasks to certified partners
